CIS 260 – Introduction to Programming (4-0-4) – Fall 2019
Section 1, Monday/Tuesday/Wednesday/Thursday, 10:15 –11:05 am

Pre-requisite: CIS 151
Class Location: Lecture (M/T/TH) – SR 152; Lab (W) – FH 127 and WH 221

Instructor: Dr. Jackie F. Woldering
Office Location: 209 Fenn Hall
Email: j.woldering@csuohio.edu
Phone: 216-523-7505
Office Hours: By Appointment

Teaching Assistants:

1. Emre Hatay
   Office Location: 305 Fenn Hall
   Email: e.hatay@vikes.csuohio.edu
   Office Hours: Tuesdays and Thursdays, 2:00 pm – 3:30 pm

2. Bhuvana Chandra Atche
   Office Location: 133E Fenn Hall
   Email: b.atche@vikes.csuohio.edu
   Office Hours: Mondays and Wednesdays 12:00 pm – 2:00 pm

Catalog Description: Introduction to the principles of computation, problem-solving methods, and algorithm development on a computer using a popular programming language. Development of good programming style and basic skills of designing, coding, debugging, and documenting programs. Topics include sequence, selection, iteration, methods, class, arrays, strings, and basics of inheritance.

Key Concepts: Problem Solving, Sequencing, Selection, Iteration, Abstraction, Encapsulation, Class, Method, Inheritance, Error Handling, Objects

Expected Outcomes: Upon successful course completion, a student will be able to:

- Write well-designed and well documented programs
- Understand basic object-oriented terms and concepts including abstraction, encapsulation, inheritance and polymorphism
- Be able to utilize fundamental programming constructs in Java including loops, conditions, objects, arrays, strings, input/output
- Understand basic testing concepts for small programs
- Apply OO concepts such as Inheritance and Polymorphism in Java programs
- Understand and implement exception handling, abstract classes and Interfaces

Text: Introduction to Programming Using Java, Eighth Edition. David J. Eck. Available as an open access text (no cost) at http://math.hws.edu/javanotes8/.

Last Day to Drop with Full refund: August 30, 2019
Last Day to Drop: September 6, 2019
Last Day to Withdraw: November 1, 2019

Grading: The course grade is based on your overall and sustained performance throughout the entire semester. The final grade is distributed among the following components:

Programming Assignments (2-4 in total) ---- 15% of grade
Closed Labs (one per week) ---------- 25% of grade
Reading Quizzes (on Blackboard) ---------- 5% of grade
Peer-Instruction Discussions ---------- 8% of grade
Mid-term exams (4) ---------- 32% of grade
Final exam ---------- 15% of grade

In general, grades are determined as follows (I may change this slightly, but only in a manner that will benefit the students):

Grade >= 90% ---A
87 <= Grade < 90---A-
83 <= Grade < 87---B+
80 <= Grade < 83---B
75 <= Grade < 80---B-
70 <= Grade < 75---C+
65 <= Grade < 70---C
60 <= Grade < 65---D
Grade < 60---F

Exam Policy: All exams will be in class. You will be allowed to bring to the test a summary page (standard letter size) with your own notes, either hand written, or printed with minimum 10-point font with 1-inch margins. The use of books, cell phones, calculators, and any electronic devices is prohibited during quizzes or exams. Any form of communication including the sharing of notes in the quiz and examination is also prohibited.

Make-up Exam Policy: Ordinarily, no make-up exams will be given. A make-up exam will be considered only in case of documented emergencies and only when the instructor is notified about the emergency as soon as possible. If this is not done, the grade is automatically 0 for that exam. It is your responsibility to contact the instructor for arranging a make-up time. Written verification for your inability to take an exam will be required.

Homework Policy: All homework and assignments are due on the specified date. Each assignment handout will specify if the assignment is to be completed individually, or pairs (if indicated on handout). All assignments must be independently completed and must represent the original effort of the student(s) turning in the assignment. Should multiple students turn in substantially the same solution or program, in the judgment of the instructor, the solution will be considered a group effort. Both or all involved in a group effort homework will receive a zero grade for that homework/assignment. A student turning in a group effort homework/assignment more than once will automatically receive an "F" grade for the course.

Slip Days: You have a total of three "slip" days that you can use. You are free to choose when you want to use a slip day for any of your assignments. For example, you can turn in Assignment 2 a day late, and Assignment 4 three days late. Once you have exhausted all three of the slip days, you will be unable to turn in any work late.

Late Assignments: An assignment turned in later than the due date (slip days notwithstanding) will be penalized 25% of the total possible points for the assignment for each calendar day late.

Student Conduct: You are expected to do your own work. Academic misconduct, student misconduct, cheating and plagiarism will not be tolerated. Violations will be subject to disciplinary action as specified in the CSU Student Conduct Code. A copy can be obtained on the web page at: http://www.csuohio.edu/studentlife/conduct/index.html or by contacting the Judicial Affairs office at the Division of Student Affairs at 216-687-2048. If you're in doubt that some action can be construed as cheating, *don't do it! It's not worth it!*

Method of Instruction: This course uses (a) traditional lectures based on recitation of the material, (b) peer-instruction discussions in class prompted by directed questions, (c) live presentation of software in the classroom, and (d) closed lab sessions. During the closed lab sessions, students will implement small pieces of code related to the topics discussed in class. Students are encouraged to actively participate in the class discussions.

Peer-Instruction Discussions: During most lecture periods, you will engage in *peer instruction* discussions. The instructor will pose questions, typically of the multiple-choice form, and solicit responses. These responses will be followed by discussions in the class. These discussion responses will be graded based on participation only, not based on correctness of responses. You will get full credit for a class period if you respond to at least 75% of the questions, regardless of how many of these responses are correct answers.

Closed Labs: The Wednesday class period of each week will be devoted to closed lab sessions. Students will meet in the assigned computer lab instead of the regular lecture hall. For each closed lab session, you will be required to complete a programming activity. One or more teaching assistants will always be available in the lab to help with any questions that may arise. Students that complete the activity designed for the day will receive full credit for the day.

Missing 4 or more Closed Lab sessions will result in an automatic reduction of one full letter grade. Missing 6 or more Closed Lab sessions will result in automatic failure in the class regardless of your score in tests, assignments, etc.

What is expected of you:

1. Class participation and regular attendance is expected.
2. Students are responsible for bringing themselves up-to-date on class material and assignments.
3. All students are expected to read the assigned chapters before attending class.
4. Exams will be a combination of material presented in lectures, covered in the textbooks, and assigned readings.
5. Homework and assignments must be completed and submitted in an operational form.

Course Schedule: The schedule of topics and their order of coverage follows. Every effort will be made to follow the schedule, but topics covered may vary depending upon progress.

Week	Date	Topic	Reading Assignments
1	26-Aug	Intro to course; Syllabus overview; Development Tools	Chapter 1
	27-Aug	Basics of Java	Chapter 1
	28-Aug	Closed Lab - Development Tools	
	29-Aug	Lab Follow up	
2	2-Sep	***Labor Day – no class***	
	3-Sep	Data Types; Variables; Expressions	Chapter 2
	4-Sep	Closed Lab - Data Types; Variables; Expressions	
	5-Sep	Lab Follow up	
3	9-Sep	Control Structures	Chapter 3, Sec 3.1 - 3.4
	10-Sep	Loops (while, for, do-while)	Chapter 3, Sec 3.1 - 3.4
	11-Sep	Closed Lab - simple loops	
	12-Sep	Lab Follow up	
4	16-Sep	Selection (if statement, switch statement)	Chapter 3, Sec 3.5 - 3.7
	17-Sep	Basics of Exceptions	Chapter 3, Sec 3.5 - 3.7
	18-Sep	Closed Lab - selection and exceptions	
	19-Sep	***Test 1 - in class***	Chap 1 - 3.7
5	23-Sep	Nested Loops	Chapter 3
	24-Sep	Nested Loops and selection	Chapter 3
	25-Sep	Closed Lab - Nested loops	
	26-Sep	Lab Follow up	

6	30-Sep	Methods and subroutines	Chapter 4, Sec 4.1 - 4.4
	1-Oct	Methods and subroutines	Chapter 4, Sec 4.1 - 4.4
	2-Oct	Closed Lab - Methods	
	3-Oct	Lab Follow up	
7	7-Oct	Program organization and design	Chapter 4, Sec 4.5 - 4.7
	8-Oct	Objects and Classes	Chapter 5, Sec 5.1 - 5.4
	9-Oct	Closed Lab - Program design	
	10-Oct	***Test 2 – in class***	Chap 3.7 - 4.4
8	14-Oct	Objects and Classes	Chapter 5, Sec 5.1 - 5.4
	15-Oct	***Columbus Day – no class***	
	16-Oct	Closed Lab - Objects and Classes	
	17-Oct	Lab Follow up	
9	21-Oct	Objects and Classes	Chapter 5, Sec 5.1 - 5.4
	22-Oct	Objects and Classes	Chapter 5, Sec 5.1 - 5.4
	23-Oct	Closed Lab - Objects and Classes	
	24-Oct	Lab Follow up	
10	28-Oct	Object-Oriented Thinking	Chapter 5, Sec 5.5 - 5.8
	29-Oct	Object-Oriented Thinking	Chapter 5, Sec 5.5 - 5.8
	30-Oct	Closed Lab - OO Thinking	
	31-Oct	***Test 3 - in class***	Chapters 4, 5
11	4-Nov	Test 3 review	
	5-Nov	Arrays	Chapter 7, Sec 7.1 - 7.3
	6-Nov	Closed Lab - OO design	
	7-Nov	Lab Follow up	
12	11-Nov	***Veterans Day – no class***	
	12-Nov	Arrays	Chapter 7, Sec 7.1 - 7.3
	13-Nov	Closed Lab - Arrays	
	14-Nov	Lab Follow up	
13	18-Nov	Sorting and Searching	Chapter 7, Sec 7.4
	19-Nov	Sorting and Searching	Chapter 7, Sec 7.4
	20-Nov	Closed Lab - Sorting and Searching	
	21-Nov	Lab Follow up	
14	25-Nov	Writing Correct Programs	Chapter 8

	26-Nov	Writing Correct Programs	Chapter 8
	27-Nov	Closed Lab - Correctness	
	28-Nov	***Thanksgiving Day – no class***	
15	2-Dec	Review	
	3-Dec	Review	
	4-Dec	***Test 4 - Programming Test***	**Comprehensive**
	5-Dec	Test 4 review	
16	12-Dec	**Final Exam (Thursday, 10:15 am – 12:15 pm)**	**Comprehensive**
